ABOUT ME

Software developer with 5+ years of professional experience, specialized in building cross-platform apps with Flutter and Dart. I've worked on everything from small web apps to large enterprise products, including a dealer management system for Ford dealerships, an offline-first field app for a major insurer, and a fitness app whose SDK has been downloaded by hundreds of thousands of users. Comfortable owning complex features end to end, making architectural decisions, and working in Agile teams or independently.

EXPERIENCE

Flutter Developer — ASAP Consulting — Feb. 2026 – Present · Remote

- Sole mobile developer in a 12-person team, with full ownership of the Flutter app for a Dealer Management System (DMS/CMS) built for Ford dealerships.
- Built the app from scratch, making every architectural and technical decision, from initial design through delivery.
- Decided how to translate the web platform's features to mobile, redesigning flows for mobile use instead of porting them one-to-one, to deliver the best possible user experience.
- Built the core modules: vehicle administration, client management and workshop administration for the dealership's service department.

Flutter Developer — Longevo — Oct. 2024 – Feb. 2026 · Remote

- Migrated a React Native codebase to Flutter to enable integration with an external SDK.
- Designed and built a complex workout player supporting dynamic exercise routines with synchronized audio and timers.
- Built a full gamification system around the workout flow — levels, badges and experience tracking — to boost user engagement.
- Led the move to a new workout-engine package to meet advanced requirements from the Product Owner, solving the technical and architectural challenges involved.

Flutter Developer — La Segunda — Oct. 2023 – Oct. 2024 · Remote

- Maintained the legacy Flutter codebase for the company's main insurance product.
- Built an offline-first app for crop hail damage appraisal, letting appraisers assess hail damage on farm fields without internet connectivity.

Full Stack Developer (Flutter / React / Angular) — Bitlogic — Aug. 2021 – Oct. 2023 · Hybrid · Córdoba

- Built university management apps for Universidad Católica de Córdoba (UCC) and Universidad Siglo 21, covering student attendance, grades and course enrollment.
- Worked across mobile and web on multiple client projects, collaborating with teams using Flutter, React and Angular.

WordPress Developer — Freelance — Jul. 2020 – Aug. 2021 · Remote

- Developed 20+ websites with WordPress and WooCommerce for clients in 4 countries.
- Managed the full client cycle: customer service, development, training and delivery.

SKILLS

Mobile: Flutter, Dart, Riverpod (specialized), Bloc

Web: JavaScript, TypeScript, React, Angular, HTML, CSS

Cloud & Backend: Firebase, AWS

Practices: MVVM, Clean Architecture, Agile, offline-first architecture, code migrations, legacy codebase maintenance

Languages: Spanish (Native), English (Fluent — C2)

CERTIFICATES

AWS Certified Cloud Practitioner (CLF) · EF SET English Certificate (C2 — 75/100)

freeCodeCamp: Responsive Web Design · JavaScript Algorithms and Data Structures · Front End Libraries
