ABOUT ME

Software developer with 4 years of experience, have worked on a variety of projects ranging from small web applications to large-scale enterprise solutions. Main skills include proficiency in programming languages such as Dart and Javascript, as well as familiarity with various software development frameworks and libraries. Have experience with software development methodologies such as Agile, and comfortable working in both team and individual settings.

EXPERIENCE

Flutter Developer *Argentina*
Longevo *Oct. 2024 - present*

- Worked on migrating a React Native code base to Flutter to enable integration with an external SDK.
- Designed and developed a complex workout player, enabling dynamic exercise routines with audio and timer synchronization.
- Built a full gamification system around the workout flow, including levels, badges, and experience tracking to enhance user engagement.
- Led the transition to a new package for the workout engine to meet advanced feature requirements defined by the Product Owner, solving technical and architectural challenges in the process.

Flutter Developer *Argentina*
La Segunda *Oct. 2023 - Oct. 2024*

- Maintained the legacy code base for the main insurance product using Flutter.
- Created an offline-first app designed to facilitate the use of the taxation services while in the field.

Full Stack Developer (Flutter/React/Angular) *Argentina*
Bitlogic *Aug. 2021 - Oct. 2023*

- Contributed to multiple projects as a versatile developer.
- Collaborated with diverse teams using Flutter, React, and Angular.

Freelancer (WordPress) *Argentina*
Freelance *Jul. 2020 - Aug. 2021*

- Developed 20+ websites with WordPress and Woocommerce across 4 countries.
- Managed customer service, development, training, and delivery.
